Equipment and Training

## FLEXIBLE FIBERSCOPES

TA01123

\*Image is for illustration purposes only

### PRODUCT DESCRIPTION

This device employs the most advanced fiber optics technology, allowing military personnel to see hostile combatants obstructed from view by the corner of a wall. Its semi-rigid glass fiber imaging bundle enables the scope to bend around obstacles while maintaining its original shape. The unique process is facilitated by fibers that are aligned coherently. This item provides EOD units and SWAT teams the critical element of surprise, allowing them to see without being seen.
