PRODUCT DESCRIPTION

The necessity to perform lifesaving operations in unsterile conditions in times of war has the potential to put the lives of the wounded at risk, bring about post-surgery complications, and extend recovery times. The Medi-T Clean Environment System ensures the optimal sanitary conditions for field patients, greatly enhancing physicians' chance of success.

MEDI-T CLEAN ENVIRONMENT SYSTEM

and Simple solution for creating a clean treatment environment – anywhere, anytime, by anyone. It is a high-quality, mobile, fast-deployed medical treatment unit, especially designed and developed, using extensive field experience, in order to provide optimal solution for the medical teams out there.

MEDI-T CLEAN ENVIRONMENT SYSTEM

pressure technology in order to create an absolute clean and isolated environment – 26 HEPA filters evenly distribute clean air inside the Medi-T unit and the entire air volume within the unit is being replaced 70 times per hour.

MEDI-T CLEAN ENVIRONMENT SYSTEM

with ISO class 6 according to ISO 14644, IES RP-CC006.2 and NEBB directions.

MEDI-T CLEAN ENVIRONMENT SYSTEM

for a wide variety of medical applications, from lifesaving surgical procedures under field conditions, to mobile, handy solution in cases of emergency or disasters situations,

MEDI-T CLEAN ENVIRONMENT SYSTEM

in various modes of operation, according to the client

SPECIFIC NEEDS:

- outdoors or indoors
- single or number of units (separate or combined together)
- Fast deployment or standby

MEDI-T CLEAN ENVIRONMENT SYSTEM INTEGRATED SOLUTION:

- Packed in three, mobile, hand-carried bags
- Easily transportable and storable
- Simple to install and operate
- Integral lightning system
- Integral air-conditioning system (optional)

STRUCTURE

Construction: PVC-Coated Tarpaulins

color red; Weight: 610 g/m²

Floor: PVC-Coated Tarpaulins

color white; Weight: 610 g/m²

Walls: PVC-Coated Tarpaulins

color transparent green w grid; Weight: 350 g/m²

Windows: Transparent PVC sheet; thickness 0.3 mm

Foldable inner-construction: Aluminum tubing w.detachable joints

FILTE RING SYSTEM

26 HEPA Filters (specifically constructed for Medi-TTM)

Air change ratio volume – 16,23 m³

Supply airflow – 1140 m³/h

Air changes – 70 per hour

Filtration Efficiency – 99.99% for 0.3 micron particles and larger

Meets ISO class 6 acceptance criteria (class 1,000 according to F.S. 209E)

for an airborne particulate cleanliness level
