HOMELAND SECURITY Equipment and Training

WARNING:

All metal detectors should only be used by trained personnel who have a thorough understanding of their operation. If the user of a metal detector does not follow the operating manual and the unit is not set up properly, it can allow metal objects to pass through undetected.

Metal detectors have been associated with EMI (electromagnetic interference) that may potentially effect pacemakers and ICDs.

We recommend that any patient with such a device be screened by alternative methods.

WARRANTY

- 24 months parts and labor
