PORTABLE PURIFICATION DIESEL ENGINE

TA10032

*Image is for illustration purposes only

PRODUCT DESCRIPTION

The MPDS is a diesel-driven multi purpose decontamination system for decontaminating cold water, hot water, hot steam (140°C) or dry steam (210°C). Due to its modular construction, a universal application as a single unit or an integration in complex decontamination systems can both be carried out. It is also capable of generating hot water.
