EMERGENCY BLANKET

TA10062

PRODUCT DESCRIPTION

TAR's compact, lightweight NASA-developed Emergency Blanket is designed to provide a variety of life-saving functions for individuals in emergency situations.

*Image is for illustration purposes only

APPLICATIONS

- Maintains up to 80% of your radiant body heat, preserving crucial warmth.
- Large enough (84" x 52") to cover an individual of average height.
- Reflective surface perfect for bouncing off sunlight, helping search parties identify your location.
- Non-porous material allows you to collect and store drinking water.
- Good for cooking food by wrapping it into the blanket and placing near an open fire.

* For full efficiency, the shiny side of the emergency blanket should face your body since this side reflects almost all of your body heat.
