FEATURE HIGHLIGHTS

The RIOT CONTROL SHIELD is made of durable but light alloy. With a height of 3.75 meters and width of 8 m, (basic version) it is able to block 36 armed adults. The Shield is equipped with 6 loopholes, allowing security personnel to fire of rubber/gum projectiles. It can be lifted up to a 2.5 meters height and used as a gate for allowing police to fend off protesters. This method can also be used if the terrain provides personnel a tactical advantage. The adaptive, high resistance rubber cover offers defense against thrown projectiles. A high pressure gas gun built into the shield ensures a crowd control solution in extreme situations.
