## NON LETHAL HAILING SYSTEM

TA03006

### PRODUCT DESCRIPTION

This Loudspeaker Systems projects the highest quality of crystal clear, undistorted voice and warning audio with a continuous audio output of 146dB RMS at a range up to 2,000 meters. This is the acoustic system of choice for the U.S. and Allied Armed Forces when it comes to force protection, long range directed warning projection, or mass notification. It includes 6 powerful loudspeakers that can be quickly reconfigured into two horizontal 3 speaker arrays mounted in integral ruggedized, waterproof rotomold cases.

### OPTIONAL FEATURES

- 256 channel UHF wireless transmitter/receiver set with plug on transmitter.
- Accommodates any standard microphone and audio devices with an XLR plug.
- Speaker cable extensions to increase speaker cable length to 200' (60m).
- Manual or powered remotely controlled Pan and Tilt mechanism (SC3600AD).
- Dual 1000 watt amplifier / control module to control up to four 3 speaker arrays.

The Alert System provides the operator additional control capability. It features a proprietary software program for installation on a Windows® PC, that enables the user to download, manipulate, locally record, edit, and store high quality .WAV pre-recorded voice messages, warning tones, and siren files on the PC. Then the user can upload any number of selected files to an Output Station (ACOS) to be projected through the sound system.
