BALLISTIC HELMET & VISOR

TA03042

*Image is for illustration purposes only

FEATURE HIGHLIGHTS

- Shell Body- made from ballistic aramid fabrics impregnated with a catalyzed phenolic resin system or other resin system suitable for the intended use.
- Helmet shell - laminated structure of ballistic materials suitably bound by heat and Pressure. The outside of surface is painted in matte.
- Edging - the edging is made of a rubber compound.
- Suspension assembly- Head Band and Chin Strap.
- Interior suspension assembly - made as a 4-point system or per customer request.
- Cushion Pad- cushion pad is 5mm thick and made of durable high compression foam (EVA foam).
- Forming of Shell – with the use of a pinwheel.
- Molding - shell body is formed using matched-die molding. The outer and inner surface is smooth. The edge is finished smooth with no ends of fabric fibers exposed.
