## FAST-ROPE HOOK

TA02039

\*Image is for illustration purposes only

## PRODUCT DESCRIPTION

The innovative Fast-Rope Hook was designed according to the leading safety and engineering standards. It automatically locks the rope in place when a load is applied. This function prevents accidental releases. Unlike a conventional cargo hook designed to release in the event of an aircraft emergency, the Fast-Rope ensures 100% safety, allowing personnel to focus on the assignment ahead of them instead of possible equipment malfunctions. These safety features make the device ideal for personnel training. The hook is an excellent tool for operators using a rescue hoist to fast-rope safely while preventing undue stress to the hoists.
