BALLISTIC VEST LEVEL IIIA

TA06024

PRODUCT DESCRIPTION

Our bulletproof vest meets U.S.A. NIJ standard 0101.04. (Usually the highest threat level in soft body armor). It is capable of withstanding caliber 7.62× 25mm shots weighing 5.5g with a ballistic velocity of 450m/s and protects against weapons such as: the .44Magnum Lead SWC Gas Checked, 9mm FMJ, and 9× 19mm submachine/carbine velocities.

FEATURES

The ballistic vest is flexible and provides excellent wearing comfort. It is not affected by water and doesn't need special protection. Due to the high sonic velocity within the fiber, impact energy is dissipated very rapidly over a large area. This results in a low blunt trauma, with the indentation on the inside surface side of the vest.
