PRODUCT DESCRIPTION

Together with a suitable filter or breathing apparatus, the Protective Mask protects a user's face, eyes and breathing organs against CBRN agents in the form of gases, vapors and solid or liquid aerosols. The mask was especially designed for protection of riot control units but is also ideal for rescue teams, fire fighters, civil defense and industrial applications personnel. It fully meets EN 136 (Class III) and EN 148-1 standards and is compatible with riot control helmets. The mask also allows use of various types of communication headsets. It's manufactured in one universal size. The construction of the sealing edge ensures a perfect fit for all adult face shapes and sizes outside of extremely small ones. Material used for the face piece allows prolonged use under any weather condition.

The inhalation chambers for filter connection are fitted with the Rd 40x1/7" thread in conjunction with the EN 148-1 standard (NATO standard). The mask is available with a drinking device which enables safe drinking from a special plastic bottle (PE, 0,8 l) in contaminated areas.
