## PRODUCT DESCRIPTION

Along with a full face mask, mouthpiece assembly or blower unit, the Protective Filter, provides reliable protection of air passages against a wide range of harmful substances. Filter components are made of hard plastic resulting in a highly durable make capable of withstanding strong impact during operational use. This advanced device provides protection against solid and liquid aerosols, smoke-producing agents, radioactive particles, microorganisms, fibers such as asbestos, organic or inorganic acid fumes, hydroxides, organic solvents with a boiling point above 65°C, ammonia, amines, inorganic and acid gases, agricultural chemical combustive gases, tear gas, irritants and other toxic substances.
