## COOLING SUIT

TA01038

### PRODUCT DESCRIPTION

The Cooling Suit is made from machine washable, fire retardant Nomex® or Kermel® and provides safe, cool wear for personnel required to maintain a high level of efficiency and concentration under extremely hot weather conditions. It is ideally suited for bomb technicians and surveillance operations as well as personnel being transported in non-air-conditioned armored vehicles.

The cooling system offers protection against heat, flash fires, and strenuous work in hot environments using ice water to remove body heat. No hazardous pressurized canisters or toxic cooling agents are required. Testing for the effects of over-pressure, fragmentation, ballistics, body impact, and heat have proven this suit to be suitable for wear beneath bomb suits, chemical suits, and in other situations where body heat removal is desirable.

### KIT CONTAINS

- 1 one-piece suit with cooling mechanisms on the trunks, sleeves, and pants
- Close fitting, open-faced hood with cooling for head
- Cooling unit & pouch
- 2 water bottles
- Battery pack
- Transport bag
