UXO SUIT

TA01041

PRODUCT DESCRIPTION

The UXO Suit is the only protection bomb disposal technicians can fully rely on during the dangerous task of dismantling an explosive device. It comes in two parts: an upper portion providing protection for the chest and neck area, and the bottom one for the groin and legs. Unlike other protective suits, this one has adjustable straps enabling the operator to move around and remove it freely without any assistance.

TECHNICAL DESCRIPTION: UPPER PART

- Armored vest with neck guard protecting the front and back of the wearer.
- Front pocket for additional ballistic insert increases the level of protection for an explosive impact of up to 250 gr of TNT.

BOTTOM

- The protective pants are designed to allow maximum flexibility.

SUIT PROTECTION

*The suit's protective material is made of Aramid, a highly effective ballistic fabric affording an optimal level of security.

Suit: Level IIIA 436 m/s (1430 ft/sec).

Optional - Suit: V50-600 m/s (2000 ft/sec).

Hard Armor: Ceramic plate or Unidirectional Polyethylene plates; Threat level III & IV.
